Contents of Volume 67

Volume 67, Number 1, November 3, 1975

AUTHOR INDEX, Volume 67, Number 1 ii

SAUL KIT and WAI-CHOI LEUNG. Effect of Chloramphenicol and Cycloheximide on the Formation of Mitochondrial-Specific Thymidine Kinase Isozymes in HeLa (BU25) Cells 1

PHOEBE H. LOHMAR and DAVID O. TOFT. Inhibition of the Binding of Progesterone Receptor to Nuclei: Effects of o-Phenanthroline and Rifamycin AF/013 8

GEORGE E. BETTINGER and FRANK E. YOUNG. Tunicamycin, an Inhibitor of *Bacillus* Peptidoglycan Synthesis: A New Site of Inhibition 16

CHIKAKO SATO, KIYOHIDE KOJIMA, and KIMIKO NISHIZAWA. Recovery from Radiation-Induced Decrease in Cell Membrane Charge by Added Adenosine Triphosphate and its Modification by Colchicine or Cytochalasin B 22

STEVEN HUBER and GERALD EDWARDS. The Effect of Oxygen on CO_2 Fixation by Mesophyll Protoplast Extracts of C_3 and C_4 Plants 28

KLAUS D. KULBE, KENNETH W. JACKSON, and JORDAN TANG. Structural Evidence for a Liver-Specific Glyceraldehyde-3-Phosphate Dehydrogenase 35

JOHN GOW and ALASTAIR C. WARDLAW. Iodination of a Mixture of Soluble Proteins by the [^{125}I]-Lactoperoxidase Technique 43

A. FAIVRE-BAUMAN, D. GOURDJI, D. GROUSELLE, and A. TIXIER-VIDAL. Binding of Thyrotropin Releasing Hormone and Prolactin Release by Synchronized GH3 Rat Pituitary Cell Line 50

BRUCE D. HOWARD. Effects of β-Bungarotoxin on Mitochondrial Respiration are Caused by Associated Phospholipase A Activity 58

GEORGE L. CATIGNANI. An α-Tocopherol Binding Protein in Rat Liver Cytoplasm 66

HEINZ GEHRING, KENNETH J. WILSON, and PHILIPP CHRISTEN. Conspicuous Degree of Homology Between the Mitochondrial Aspartate Aminotransferases from Chicken and Pig Heart 73

SCHIZUYO SUTOU and HIROMI SHINDO. Concanavalin A Induces Endoreduplication in Cultured Mammalian Cells 79

JULIAN N. KANFER, G. LEGLER, JOHN SULLIVAN, SRINIVASAN S. RAGHAVAN, and RICHARD A. MUMFORD. The Gaucher Mouse 85

R. BUEHLER and F. MOOLTEN. Abnormal Response of Glycolipid Synthesis to Temperature in Transformed BHK Cells Thermosensitive for Growth Control 91

RICARDO S. CALANDRA, JORGE A. BLAQUIER, ENRIQUE J. DEL CASTILLO, and MARCO A. RIVAROLA. Androgen Dependency of the Androgen Receptor in Rat Epididymis 97

H. FRANKLIN BUNN, DAVID N. HANEY, KENNETH H. GABBAY, and PAUL M. GALLOP. Further Identification of the Nature and Linkage of the Carbohydrate in Hemoglobin A_{1c} 103

K. K. REDDI. Nature and Possible Origin of Human Serum Ribonuclease 110

JAN L. BRESLOW, DUANE R. SPAULDING, DAVID A. LOTHROP, and ALEXANDER W. CLOWES. Effect of Lipoprotein on 3-Hydroxy-3-Methylglutaryl Coenzyme A (HMG CoA) Reductase Activity in Rat Liver Cell Culture: Special Suppressant Effect of a Lipoprotein Isolated from Hypercholesterolemic Rat Plasma 119

DOUGLAS T. BROWNE and STEPHEN B. H. KENT. Formation of Non-Amidine Products in the Reaction of Primary Amines with Imido Esters 126

DOUGLAS T. BROWNE and STEPHEN B. H. KENT. Formation of Non-Amidine Products in the Chemical Modification of Horse Liver Alcohol Dehydrogenase with Imido Esters 133

M. GORECKI, A. BAR-ELI, and A. PATCHORNIK. An Inhibitor of Soluble D-Alanine Carboxypeptidase from *Escherichia coli B* 139

JOSEPH R. REEVE, KWONG-WAH CHENG, and JOHN G. PIERCE. Partial Reduction of Disulfide Bonds in the Hormone-Specific Subunits of TSH and LH 149

DORIS TAYLOR and PAUL HOCHSTEIN. Tetrahydropterin: Reduction of Cytochrome C and Coupled Phosphorylation at Mitochondrial Site 3 156

FRANKIE K. BASKIN, WILLIAM C. DUCKWORTH, and ABBAS E. KITABCHI. Sites of Cleavage of Glucagon by Insulin-Glucagon Protease 163

K. W. COLE and F. H. GAERTNER. Phosphocellulose, an Affinity Chromatographic System for Chorismate Synthase and the Aromatic Complex of *Neurospora crassa* 170

H. GROSFELD and U. Z. LITTAUER. Cryptic form of mRNA in Dormant Artemia Salina Cysts 176

SIDNEY R. GRIMES, JR., ROBERT D. PLATZ, MARVIN L. MEISTRICH, and LUBOMIR S. HNILICA. Partial Characterization of a New Basic Nuclear Protein from Rat Testis Elongated Spermatids 182

JOSE E. GONZALEZ and ALAN PETERKOFSKY. Diverse Directional Changes of cGMP Relative to cAMP in *E. coli* 190

H. F. GILBERT and MARION H. O'LEARY. Arginine as a Substrate Binding Site in Aspartate Aminotransferase 198

BRUCE H. SELLS, STEPHEN M. BOYLE, and GRAHAM CARPENTER. Protein Synthesis During a Nutritional Shift-Up in *Escherichia coli* 203

DALLAS CLARK, DONALD LEE, ROBERT ROGNSTAD, and JOSEPH KATZ. Futile Cycles in Isolated Perfused Rat Liver and in Isolated Rat Parenchymal Cells 212

L. SANKARAN, RICHARD T. PROFFITT, and BURTON M. POGELL. Liver Peptide Stabilizing Factor Protects Phosphofructokinase Against Inactivation by Fructose-1,6-Bisphosphatase 220

ISRAEL SCHECHTER. Further Characterization of the mRNA Coding for Immunoglobulin Light-Chain 228

CLAUDE DE PREVAL and MICHEL FOUGEREAU. Absence of Preferential Reassociation Between Heavy and Light Chains of Two Human Immunoglobulins from Common Cellular Origin 236

MARTIN POE, MYRA N. WILLIAMS, NORMA J. GREENFIELD, and KARST HOOGSTEEN. Dihydrofolate Reductase from a Methotrexate-Resistant *Escherichia coli*: Proton Magnetic Resonance Studies of Complexes with Folate and Methotrexate 240

DAVID H. LEABACK and HOWARD K. ROBINSON. Ampholyte Displacement Chromatography—A New Technique for the Separation of Proteins Illustrated by the Resolution of β-N-Acetyl-D-Hexosaminidase Isoenzymes Unresolvable by Isoelectric Focusing or Conventional Ion-Exchange Chromatography 248

ERIK DE CLERCQ, PAUL F. TORRENCE, JOHN HOBBS, BOREK JANIK, PIERRE DE SOMER, and BERNHARD WITKOP. Anti-Complement Activity of Polynucleotides 255

MUTSUO YAMAGUCHI, TAKASHI YAMAUCHI, and HITOSHI FUJISAWA. Studies on Mechanism of Double Hydroxylation: I. Evidence for Participation of NADH-Cytochrome c Reductase in the Reaction of Benzoate 1,2-Dioxygenase (Benzoate Hydroxlase) 264

EDMUNDO CHAVEZ and MAGDALENA KLAPP. A New Inhibitor of Adenine Nucleotide Translocase in Mitochondria: Agaric Acid 272

CARMEN D. LOBATON, M. A. G. SILLERO, and A. SILLERO. Diadenosine Triphosphate Splitting by Rat Liver Extracts 279

MASATAKA MORI and MASAMITI TATIBANA. Glutamine-Dependent Carbamoyl Phosphate Synthetase: Polyamines Inhibit the Activity and Modify the Activating Effect of 5-Phosphoribosyl 1-Pyrophosphate 287

IKUYO TSUKAMOTO, TAKEO YOSHINAGA, and SEIYO SANO. Evidence for Histidine as Another Functional Group of δ-Aminolevulinic Acid Dehydratase from Beef Liver 294

MICHEL J. JUNG and BRIAN W. METCALF. Catalytic Inhibition of γ-Aminobutyric Acid α-Ketoglutarate Transaminase of Bacterial Origin by 4-Aminohex-5-Ynoic Acid, a Substrate Analog 301

FRANCOISE FARRON-FURSTENTHAL. Protein Kinases in Hepatoma, and Adult and Fetal Liver of the Rat. I. Subcellular Distribution 307

PATRICK ROBBERECHT, MONIQUE DESCHODT-LANCKMAN, PHILIPPE DE NEEF, and JEAN CHRISTOPHE. Effects of Somatostatin on Pancreatic Exocrine Function. Interaction with Secretin .. 315

HARALD OSMUNDSEN. A Computer Programme for the Determination of the Kinetic Constants of Two Enzymes Acting Simultaneously on the Same Substrate 324

KAZUNORI OHKI, SATOSHI NAKAMA, and AKIRA ASANO. Stimulation of Virus-Induced Fusion of Ehrlich Ascites Tumor Cells by 3',6'-Cyclic AMP 331

TYGE GREIBROKK, JAN HANSEN, RONALD KNUDSEN, YIU-KUEN LAM, KARL FOLKERS, and CYRIL Y. BOWERS. On the Isolation of a Prolactin Inhibiting Factor (Hormone) 338

CARL M. NEPOKROEFF, ASAF A. QURESHI, and JOHN W. PORTER. Cell-Free Synthesis of Pigeon Liver Fatty Acid Synthetase 345

S. E. LURIA, JOAN L. SUIT, and CHARLES A. PLATE. Initiation of Transcription is Temperature-Dependent in an *E. coli* Mutant with ts Adenylate Kinase 353

GERMAN B. VILLANUEVA, C. WILLIAM BATT, EDWARD SAUSVILLE, VICTOR TORTORELLI, KENNETH CUBELLI, and WILLIAM BRUNNER. Changes in the Exposure of Tryptophyl and Tyrosyl Residues in Thrombin due to Diisopropylphosphorofluoridate and Benzamidine Inhibitions ... 359

KENNETH BALKOW, TIM HUNT, and RICHARD J. JACKSON. Control of Protein Synthesis in Reticulocyte Lysates: The Effect of Nucleotide Triphosphates on Formation of the Translational Repressor. 366

BRADLEY ARBOGAST, JOHN J. HOPWOOD, and ALBERT DORFMAN. Absence of Hyaluronidase in Cultured Human Skin Fibroblasts 376

ARIE ROSNER, KARL M. JAKOB, JONATHAN GRESSEL, and DAPHNA SAGHER. The Early Synthesis and Possible Function of a 0.5×10^6 M_r RNA After Transfer of Dark-Grown Spirodela Plants to Light 383

NOEL RELYEA and ROBERT R. RANDO. Potent Inhibition of Ornithine Decarboxylase by β, γ Unsaturated Substrate Analogs 392

PIERRE A. CHIHA, RICHARD H. CLARKE, and RICHARD D. STRATTON. Optically Detected Zero Field Magnetic Resonance Studies of Proflavine-DNA and 3,4-Benzpyrene-DNA Complexes 403

KAZUEI IGARASHI, YASUHIRO WATANABE, and SEIYU HIROSE. Dependency of Spermidine Stimulation of Polypeptide Synthesis on the Uracil Content of Messenger Ribonucleic Acid 407

GERALD R. KEILMAN, BETTY TANIMOTO, and ROY H. DOI. Selective Inhibition of Sporulation of *Bacillus subtilis* by Netropsin 414

FRANCOIS BOUCHER and GABRIEL GINGRAS. The Photogeneration of Superoxide by Isolated Photoreaction Center from *Rhodospirillum rubrum* 421

RITA GUTTMAN and LANCE FELDMAN. White Noise Measurement of Squid Axon Membrane Impedance 427

SEUNG K. KIM and PAUL M. HOROWITZ. A Study of Dithiothreitol Inactivation of the Enzyme Rhodanese 433

C. KLEIN and M. DARMON. The Relationship of Phosphodiesterase to the Developmental Cycle of *Dictyostelium discoideum* 440

SANGDUK KIM, DAVID PEARSON, and WOON KI PAIK. Studies on S-Adenosylmethionine: Protein-Carboxyl Methyltransferase in the Hypothalamo-Neurohypophysial Complex in Organ Culture 448

ANTHONY L. TARENTINO and FRANK MALEY. A Comparison of the Substrate Specificities of Endo-β-N-Acetylglucosaminidases from *Streptomyces griseus* and *Diplococcus pneumoniae* 455

JOHN A. CIDLOWSKI. Concanavalin A Induced Glucocorticoid Resistance in Rat Thymocytes in Relation to Glucose Metabolism and Glucocorticoid Receptors 463

MOSELEY WAITE, PATRICIA SISSON, KENNETH A. FREUDE, and FRANKLIN J. ZIEVE. The Hydrolytic and Transacylation Activity of the Phospholipase A_1 Purified from Human Post-Heparin Plasma 471

MARVIN N. SCHWALB. Developmental Control of Enzyme Modification During Fruiting of the Basidiomycete *Schizophyllum commune* 478

LEONARD M. PATT and WILLIAM J. GRIMES. Ectoglycosyltransferase Activity in Suspensions and Monolayers of Cultured Fibroblasts 483

AUTHOR INDEXES, Volumes 62 - 67, 1975 1594

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 X 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 *(Arch. Biochem. Biophys.* (1966) **115**, 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a footnote,** rather then in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics** (1974) **160,** iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 X 8 in.); the original drawings should be no larger than 8.5 X 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969.* Note the following examples.

For a journal article:

1. Chattoraj, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys, 142, 363-370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.
